

TURBINE CONTROLS LTD

Progress in the Process

25th Anniversary Year

This year Turbine Controls Ltd is celebrating 25 years of supplying, maintaining and supporting Gas and Steam turbine control systems for Power Generation, Oil and Gas industries across the globe.

We would like to take this opportunity to update you on the changes at TCL that have occurred in the last 12 months.

Assuring you of a service second to none for the next 25 years and beyond.

Stephen Gregory
Managing Director

TCL, Kenilworth Drive, Oadby le2 5lg, UK

NEWSLETTER

JANUARY 2010

- **Retirement** It is with some sadness that we recently accepted Martin Knowles' wish to retire as director, however this has provided the perfect opportunity to evaluate, take stock and make the necessary changes so that we have the right mix of experience and vision
- **Restructuring** The company has undergone a restructuring process that has resulted in significant efficiencies being realised.
 - Both Sales & Projects activities are now managed by Chris Rees 
 - Andrew Boulton-Briggs has been appointed Operations Director with responsibilities for Site Services, Customer Service and Production
- **New Premises** We have now completed our move to larger premises in Oadby, bringing all our team under the one roof and providing the additional space we needed to grow the business. We have also consolidated our position in North America
- **Focus** The focus of the company remains unchanged - providing a complete solution to turbine operators for their control system requirements including:-
 - *Control system retrofit, design, manufacture and installation*
 - *Control system maintenance, service and fault finding*
 - *Consultancy and application engineering*
 - *Mechanical and electrical repairs*
- **Major Contracts** TCL have recently won contracts for major projects in the North Sea, UK Mainland & and the Middle East, together with service work, including the C & I maintenance contract for the fleet of Gas Turbines
